SUMMARY

Software Engineer experienced in building full stack web applications using React, TypeScript, and Node.js, with strong foundations in API design, system architecture, and scalable backend services. Skilled in delivering customer facing features end to end, integrating external services, and implementing secure role-based access in production environments.

SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, SQL, HTML, CSS

Frameworks: React, Node.js, Express, Next.js, Tailwind CSS

Databases & Tools: PostgreSQL, MongoDB, Redis, Supabase, Version Control (Git), Postman, Jest, GraphQL

System & DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, CI/CD

WORK EXPERIENCE

Senior Consultant - Software Engineer | Heartland Community Network

Jun 2025 - Present

Skills: React, NodeJS, JavaScript, TypeScript, PostgreSQL, Python

- Led end to end development of a full stack auction platform using React and Node.js, designing REST APIs, PostgreSQL schemas, and role based dashboards, contributing to a 40% increase in fundraising outcomes after MVP launch.
- Designed a clear and scalable architecture with well-documented APIs, database diagrams (ERD), and system flows, making the platform easy to extend and maintain for future development.
- Managed sprints and client communication, translating their evolving ideas into actionable technical tasks and ensuring every release matched their vision, usability goals, and design expectations.

Software Engineer Intern | Dream Leo

Sept 2022 - Jun 2023

Skills: React, Redis, SQL, JavaScript, Git, CI/CD, Bootstrap, WordPress, Figma, HTML, CSS

- Enhanced search engine optimization (SEO) and Google PageSpeed scores by resolving React component bottlenecks, implementing lazy loading, and eliminating redundant API calls, which resulted in a 35% increase in overall website performance.
- Partnered with UI/UX designers, analysts, and developers to redesign site navigation and layout, while conducting peer code reviews and debugging, leading to a 15% reduction in user bounce rate and 10% increase in average session duration.
- Strengthened backend infrastructure by Redis caching, optimizing SQL queries, and restructuring API endpoints reducing server response time by 20%, cutting downtime by half by stabilizing deployment through a controlled version rollback, enhancing system reliability.

Software Engineer (Machine Learning) Intern | Capgemini

Jul 2022 - Aug 2022

Skills: Python, MERN Stack (MongoDB, Express, React, Node.js), Bootstrap, Regex, HaarCascade, Jira

- Built operational efficiency by automating resume parser, reducing manual data entry time from 5 min to 1 min and improving data field accuracy by 40%, streamlining processing, minimizing errors, and summarizing information retrieval using contouring and NLP.
- Led weekly Agile sprints as Scrum Master, guiding a team in building an AI-driven full-stack resume analysis platform using the MERN stack and Bootstrap, while improving sprint velocity by 30% through structured sprint planning in JIRA and peer code reviews.
- Engineered a data extraction pipeline that achieved 60% parsing accuracy on complex resume layouts by integrating HaarCascade for image recognition, Bounding Box algorithms for structured data parsing, Regex for named entity recognition to reduce misclassification.

PROJECTS

[Arcova – Unified Travel Platform](#) (React, TypeScript, Node.js, Express, Supabase) - Built a unified travel marketplace with role-based dashboards for travelers, hosts, and admins, delivering hotel flight search, bookings, host property pricing management, and a streaming AI trip planner via SSE with Supabase Auth and RLS enforcing secure multi-tenant access.

[Course Compass](#) (React, Tailwind CSS, MongoDB, Vite, Gemini API) - Built an AI-powered course recommender to automate academic planning, generating career paths and roadmaps with 90% accuracy while handling out-of-context questions and validating all course prerequisites, credit limits, and schedule conflicts.

LEADERSHIP ACTIVITIES

- Data Intern | CEWIT:** Automated Power BI dashboards to track 13K affiliates and 5K event attendees that helped the marketing and leadership teams spot important trends and make smarter decisions. [\[Link\]](#)
- Lead Intern | CEWIT:** Led Women Who Code alliance at IU, organizing workshops, developing problem solving skills, managing interns, and collaborating with organizations to promote diversity in tech, with 9 months of experience.

EDUCATION

Indiana University – Bloomington | MS in Computer Science (GPA:3.6/4.0)

Aug 2023 – May 2025

LDRP Institute of Technology and Research | BE in Computer Engineering (GPA:8.8/10.0)

Jul 2019 – Jun 2023
